## EDUCATION

### University of California, Santa Cruz

Bachelor of Science in Computer Science

Sep. 2022 – June 2026

GPA: 3.84/4.00

## EXPERIENCE

### Web Developer Intern

Labs Laboratory / Columbia University

Dec 2024 – Present

New York, NY (Remote)

- Collaborated with Columbia University Labs, an AI and biology lab (published in **Nature**), to enhance their website.
- Designed an SVG-based **human organ interaction system** for precise localization and interaction with **15+ organs**.
- Built the system with **native HTML, CSS, and JavaScript** for **smooth, responsive interactions**.
- Integrated the system into the lab's **public knowledge platform**, enhancing accessibility for researchers and public.
- Collaborated via **GitHub PR workflows** with lab researchers to align development with scientific needs.
- Improved the lab's **online presence** and **user experience**, enhancing engagement with AI-driven biomedical research.

### Full-Stack Developer Intern & Technical Lead

3CCA Church

Dec 2024 – Present

Los Angeles, CA (Remote)

- Led the redesign and redevelopment of the 3CCA Church website, enhancing user experience and operational efficiency.
- Built a **scalable architecture** using **React.js** (front-end), **Node.js** (back-end), and **MongoDB** (database).
- Developed **core features** like event management, audio resources, and article publishing to support church operations.
- Optimized **website performance** through **responsive design** and **code splitting**, reducing load times by **30%**.
- Configured **server deployment** with **SSL certificates** and planned to deploy on **AWS** for scalability and reliability.

## PROJECTS

### AnimeHub | Full-Stack Development, React, Node.js, Express.js, MongoDB, Javascript

June 2024 – Nov 2024

- Developed a **full-stack** anime forum website for anime enthusiasts, featuring ratings, rankings, and user discussions.
- Implemented a **decoupled architecture** with separate deployments on **Netlify** and **Heroku**, ensuring **scalability**.
- Built **RESTful APIs** with **Express.js** for ratings, filtering, and user management, enhancing **backend efficiency**.
- Optimized **MongoDB** by embedding ID arrays to **simplify data access** and **reduce query overhead**.
- Implemented **JWT authentication** with an **Axios interceptor** for **token refresh** and **seamless API retries**.
- Added multi-language support using **i18n**, storing language preferences in user accounts for persistent customization.
- Enhanced the user interface using **Ant Design** and **Material-UI**, improving usability and **visual appeal**.

### Personal Website | Frontend Design, Next.js, Tailwind CSS, Typescript

Oct 2024 – Jan 2025

- Developed a **personal portfolio** website using **Next.js** and **TypeScript**, focusing on **minimalist UI design**.
- Built **reusable glassmorphism components** with **Tailwind CSS** and **TypeScript** for scalable, maintainable code.
- Enhanced **user experience** with **Framer Motion** for **smooth animations** and **immersive browsing**.
- Implemented **system-synced light/dark mode** with **next-themes**, supporting **seamless theme switching**.
- Designed **responsive layouts** with **Material UI breakpoints** and **Tailwind CSS** for **cross-device consistency**.
- Deployed on **Vercel** with a **custom domain** and **continuous updates** for better functionality and user experience.

## TECHNICAL SKILLS

**Programming Languages:** JavaScript, TypeScript, Python, C++, Java, C

**Frameworks & Libraries:** React.js, Next.js, Redux, Tailwind CSS, Node.js, Express.js

**Databases, DevOps & Tools:** MongoDB, Redis, SQL, Git, Docker, AWS, Linux, Nginx, GitHub Actions
